Subject 6080 - Lonsdale Bleachery Smokestack

Frank:

FDS Industries would prefer not to demolish the smokestack and would be interested in discussing alternative ways to secure the site for the EPA. However, per your request and to ensure the river is cleaned in a timely manner, we are pursuing bids to demolish the smokestack for discussion and analysis only.

Either Bill Walker, Vice President of TPG Construction, and/or I will contact you when the bids are received to review the matter further. We are always reachable at 401.946.4600 should you require anything.

Best regards,

TPG Development
